PROJECTS / OPEN-SOURCE

NexusNet | [Link](#)

Python, Django, PostgreSql, HTML, Bootstrap,

It is service which combine blogging and instant messaging - for registered users to post, share, like, reply to tweets with short messages. Nonregistered users can only read tweets. These tweets can contain text, video, photo or links.

CineBot | [Link](#)

Python, Python-telegram-bot, Mysql

Bot takes data from few popular movie platforms through parsing. The telegram bot helps to get information about movies and daily news from this website(the bot parses the data from the website instead of getting data from server).

BookHive | [Link](#)

Django, DjangoRESTframework, Postgresql, Javascript

The website is an online platform designed to provide a comprehensive and user-friendly experience for book enthusiasts. It serves as a digital library, allowing users to explore, search, and access a vast collection of books.

EduBot | [Link](#)

Python, Aiogram2, Postgresql

The Education Testing and Assessing Bot is an innovative and automated tool designed to assist in the assessment and evaluation of educational content and student performance. It leverages natural language processing capabilities to provide efficient and reliable testing and assessment solutions.
